

Security - Tube Fencing

HEAVY DUTY SECURITY

When security is paramount, our Heavy Duty Security Fence ensures this. With its heavy duty structure, sharp flattened crimped spearhead and the versatility of hinged and sliding gates, this fence makes good security sense for any commercial or industrial property or government applications.

MEDIUM DUTY SECURITY

Simple clean cut security describes our Medium Duty Security Fence. With its clean cut lines and spearheads crimped to a decorative but effective sharp point, scaling the fence is near to impossible. Perfect for medium to high security applications such as car yards or light industrial properties, this fence will fulfill your needs perfectly.

LIGHT DUTY SECURITY

Security strength and cost effectiveness is the best you can get when it comes to a fence and our Light Duty Security has it all. This fence is perfect for those applications that won't block the view no matter what side of the fence you're on. Great for car yards, garden nurseries, domestic homes or light industrial applications.

Broadhurst Lock (optional extra)

The locking system is where security starts. The weaker the lock the more accessible the entry. But with our Broadhurst Lock "NO KEY - NO ENTRY". With the internal padlock system, bolt cutters are useless and nor will they cut through the 22mm solid steel padbolt.

Now that's *SECURITY AT ITS BEST*

SECURITY PLUS FIXING

With the increase of crime and the need to obtain a professional, attractive business premises, a fence had to be developed to obtain a standard of attractiveness with security performance. Our tubular security fence range offers these 2 major points. Other fences have the look, but the downfall is the way the panels are fixed. With the internal L-Bracket system, panels are secure and safe from intruders unscrewing panels to gain access. Another benefit is there are no exposed brackets, only a neat butt joint to the post with only one screw being displayed.

AVAILABLE HEIGHTS 1200, 1500, 1800, 2100 & 2400MM
