Colors displayed on this color card are a guide only and have been matched as closely as possible to Interpon production standards under daylight conditions. Due to the nature of the printing process, some degree of color and gloss level variation may occur. Where more than one finish is available, product color may vary. We recommend that you use production line prepared samples for final color selection or approval.

## The Future Of Color

People are driven by emotion – and color elicits different emotions in people. As the world's largest coating company, no other company has more experience in color trends than AkzoNobel. Home to the Aesthetics Centre, our in-house color and design experts anticipate and predict movements in trends that affect color and coating choices for architectural applications. We have drawn on the knowledge of our global Aesthetics Centre, along with our own Australian insights, to produce this Residential Architectural Powder Coatings Collection, Color For Living.

## Trend Collection – Driven By Design

The **Trend Collection** heralds the color themes of emerging architecture and allows harmony to be created within an environment designed for everyday living in Australia.

## Sablé™ Collection – Tactile In Design

The exclusive **Sablé™ Texture Collection** features a subtle deflection of light emerging from within a tactile surface. This allows for seamless fusion and intimacy with both natural building materials and rendered finishes.

## Vivica™ – Pearlescent Range

The **Vivica™ Pearlescent Range** adorns acclaimed modern design with a soft metallic finish, providing luxury and richness with its timeless pearlescent lustre.

## Collection Anodic

From the 'Timeless' Collection Anodic 'Classic' range featuring soft metallic tones to the 'Modern': **Anodic Précis™** Interpon's next generation smooth low gloss 'anodised look' powder coatings. Both offer an enviable choice when seeking alternative coatings to anodising.

## Color Freedom

AkzoNobel values the importance of color and finish in your design and understands that color expression is an extension of your project. Why not take advantage of our made-to-order color service. For smaller projects down to 20kg, **Interpon MiniB™** and **Interpon MiniB™ Micro** provides fast service on small batch made-to-order colors that are specific to your needs. Some conditions do apply such as choice of color and product. Please contact the Interpon Customer Care Team for additional advice.

## Green Star Rating

While **Interpon D1000** Powder Coatings are available in all colors, **every color is green**, which also safeguards our precious environment. Please contact the Interpon Customer Care Team for Green Star Rating advice.

## Residential Warranty

**Interpon D1000** is supported by a 10 Year Residential Warranty\* covering both color and film integrity. Designed exclusively for residential applications, projects must meet the following criteria for the warranty to apply:

- Application to aluminium only,
- Residential applications equivalent to Volume 2 (pertains primarily to Class 1 or Class 10 buildings) of the Building Code of Australia 2011,
- No greater than three (3) levels above ground,
- Located greater than 100 metres from any coast line.

\*Conditions apply to the **Interpon D1000** Bronze Global Residential warranty. A copy of the warranty is available upon request.

## Interpon D Approved Applicators

AkzoNobel has developed the Interpon D Approved Applicators Network to support the Interpon D Global Warranty Program. This program is designed to ensure the Interpon powder coating you choose is applied correctly, meeting Interpon Powder Coatings warranty requirements to local and international standards.

## How To Specify Interpon Powder Coatings

Once you have chosen Interpon Powder Coatings for your project, it's important to use the correct product. So we make specifying Interpon powder coatings easy. Simply:

- a. Nominate the Interpon product. e.g. **Interpon D1000**.
- b. Nominate the color, finish and product code. e.g. Anodic Natural Matt GY235A.

Please contact the Interpon Customer Care Team for additional specification support and advice.

## Commercial Product Range To Suit Every Project

To compliment the **Interpon D1000** residential range, AkzoNobel offers, **Interpon D2015 Ultriva™** and **Interpon D3020 Fluoromax®** commercial range of powder coatings for exclusive residential, commercial and prestigious commercial projects with extended warranties "on building" for up to 30 years, depending on project specifications. Please contact the Interpon Customer Care Team for warranty and specification support and advice.

## Interpon – Your Partner In Success

Interpon Powder Coatings has a range of materials and resources to help you succeed with your project – from the selection of product, coordination of color, meeting of project specifications, choosing an approved applicator right through to ongoing care and maintenance advice. The Customer Care Team at Interpon Powder Coatings is ready and willing to assist you with your next project.
